## NEW CRUISE QUAY

Nordhavnen is a booming area. Once fully developed, the area will span over 4 million square meters, housing as many as 40.000 residents, and an equivalent amount of jobs.

In connection with the comprehensive modernization of the area, a brand new cruise quay is being constructed. During summer, the new quay will function as a focal point for cruise ships stopping by the capital.

In the winter season, Terminalerne will function as a unique location for events, with a distinctive and maritime character: a space that can easily accommodate the increasing demand for exciting venues in the cityscape of Copenhagen, and facilitate cultural initiatives and events in an extraordinary setting.

## THE TEAM BEHIND TERMINALERNE

The team behind Terminalerne also comprises the people behind TAP1 in Carlsberg Byen. At TAP1, we believe that future urban spaces will be defined somewhere between new currents, and the respect for authentic, original environments. We have already demonstrated this conviction with our work in the Carlsberg City on Vesterbro, and this inspiration will now be carried out in another upcoming area of the capital.

Terminalerne are a further development of TAP1's involvement in the urban life of Copenhagen, and the project constitutes an innovative plan for the development of future urban spaces. By integrating progressive architecture with the rustic and maritime character of the harbor area, the ambition is to create a venue that can develop the area, making the future Nordhavn an asset to the capital.

## FACTS

- Newly built
- Ready for use from October 2014.
- 2 terminals – each terminal contains;
  - 2 halls of approx. 1200 square meters each
  - Toilet facilities
